Course Name: Advanced Web Technology		EXPERIMENT NO. 11	
Course Code: 20CP314P Faculty: Dr. Ketan Sabale		Branch: CSE	Semester: VI

(To be filled by Student)

Submitted by: Sahil Godhani

Roll no: 20BCP291

Objective: Apply Flask framework to implement the webpage.

Experiment: Use the database with Flask webapp.

Q1. Write a program for following task using Flask framework:

   Create a index.html webpage which has a form for submission of some users' data like name, email, address, hobby etc (You can consider attributes based on your choice). The index.html provides two buttons, submit and view. The submit button will store the entered data in the database and view button will retrieve the stored data from the database. The retrieved data should be posted on index.html in form of table.
